

EvergreenHealth Breast Health Center

Mobile 3D Mammography Coach

Accurate, comfortable and convenient

Schedule a Coach Visit *at Your Location*

- Call **Erica Marulanda**, the EvergreenHealth Mobile Mammography Outreach Coordinator, at **(425) 899-2532**. Erica can assist with planning, scheduling and promoting your Coach visit.
- Coach visits may be stand-alone or joint events at corporate sites, wellness fairs, retail locations, outdoor markets, places of worship and other social gatherings.
- Generally, 12-18 patients are scheduled during the Mammography Coach visit. Please get in touch to discuss the specifics of your event.
- Only screening mammograms will be provided. (Diagnostic mammograms are performed at EvergreenHealth Breast Health Center.)
- A level parking location is needed to accommodate the 40 ft. Coach. (8-10 parking spots).

There is no handicapped access – patients must be able to climb 3-4 steep steps unassisted.

 RADIA®

Bring the benefits of regular breast cancer screening to Our Community's Doorstep

Benefits of on-site mammography:

- Gain increased employee wellness at **NO COST** to you: more wellness checks, more productivity with on-site services.
- Communicate concern for employee well-being and increase community goodwill.
- Raise breast cancer awareness to improve overall health and promote healthy practices.

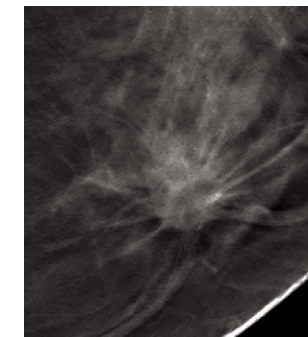

The Mammography Coach experience:

- The Coach offers the same high quality, state-of-the art, digital 3-D mammography technology used in the Breast Health Center at EvergreenHealth's main hospital campus.
- Patients receive their mammograms with convenience, comfort and privacy in an attractive setting.
- The hassle-free exam is completed in about 20 minutes.
- Appointments are made through our scheduling department.
- Mammograms are billed to the patient's insurance company.
- Patients are asked to bring a picture ID and current insurance card with them to the appointment.
- Results of the exam are available within 10 business days and a copy of the results will be sent to the patient's healthcare provider.

3D Mammography: superior detection

Digital Breast Tomosynthesis, or "3D mammography", has been shown in clinical studies to be superior to 2D digital mammography alone.^{1,2} 3D Mammography,

3D DIGITAL MAMMOGRAM

generates a stack of images of one-millimeter-thin layers of the breast tissue. Instead of viewing all the complexities of your breast tissue in one flat image, the doctor can examine the tissue a millimeter at a time. Fine details are more clearly visible, no longer hidden by the tissue above and below,

giving more accurate information for screening and diagnosis. "Call-backs" are reduced by up to 40%.^{1,2}

EvergreenHealth exceeds the national averages for early detection of breast cancer and long-term survival rates

Outcomes	EvergreenHealth	National
Patients diagnosed in early stages, due to advanced methods & technology	91%	86%
Five year survival rate	92.5%	85.5%
No recurrence of disease after 12 years	98%	85%
